March 1, 2013

Dear Parents/Guardians, Students and Staff,

Code.org is a recently launched non-profit foundation dedicated to growing computer science education in our nation's schools. The foundation recently produced a short video, featuring Bill Gates, Mark Zuckerberg, Chris Bosh, Will.i.am, and other public figures, to rally interest in Computer Science education among students, their parents, and educators.

This must-see video illustrates the growing importance of our students' learning to code and reinforces our district's commitment to provide educational opportunities in computer science, and more generally, across STEM (Science, Technology, Engineering, and Mathematics).

This year 60 of our students enrolled in computer science courses at Verona High School, including 30 students in the College Board's AP Computer Science course and 7 students earning college credit in our Dual Enrollment Option through New Jersey Institute of Technology (NJIT).

Please take a few moments to view this video at your convenience through the link below.
