

Problem accessing PDF Documents by Single-Click on Macs

Some users of Macs may have trouble opening some PDF documents *by single-click* in Safari. This problem was introduced in the release of Safari 5.1.

The problem is described in detail here:

http://kb2.adobe.com/cps/908/cpsid_90885.html

To solve this problem:

- Download and install the most recent version of [Adobe Reader](#)
- Choose one of the following workarounds:
 - Control-click to save the PDF file to the computer, then double-click on the saved file to open it in Adobe Reader.
 - Continue to use Safari 5.0
 - Download and install the [PDF Plug-In for Firefox on Macintosh](#) and use Firefox.
