Common Sense Media is dedicated to improving the lives of kids and families by providing the trustworthy information, education, and independent voice they need to thrive in a world of media and technology.

We exist because our nation's children spend more time with media and digital activities than they do with their families or in school, which profoundly impacts their social, emotional, and physical development . As a non-partisan, not-for-profit organization, we provide trustworthy information and tools, as well as an independent forum, so that families can have a choice and a voice about the media they consume.

What We Do

Rate

AGE 2 4 6 8 10 12 14 16 17

CommonSense.org has the largest, most trusted library of media ratings and reviews that help parents, educators, and kids select media based on **age-appropriateness** and **learning potential**. Our goal is to give you trustworthy information so that you can decide what works for your family.

Our parent blog, Making Sense, offers families tips and advice to make healthy media choices. You can also find us on your local cable provider and favorite websites, including Comcast, Time Warner Cable, Netflix, AT&T, DirecTV, AOL, and Verizon.

Educate

We provide **FREE** curricular content, interactive learning tools and programs that promote deeper learning skills on topics ranging from digital citizenship to research literacy. Our K-12 Digital Literacy & Citizenship Curriculum, developed in partnership with Harvard University's Graduate School of Education, teaches students to be safe, responsible, and ethical online.

Our website offers educators curriculum toolkits, professional development, and a blog where we share best practices from the field.

Advocate

DO NOT TRACK KIDS

As an authoritative and respected non-partisan voice, we work to give families a voice – and opportunities to encourage policymakers, media companies, and others to improve the media environment for all kids.

Investigate

Common Sense Media's Program for the Study of Children and Media provides parents, educators, health organizations, and policymakers with reliable, independent data on children's use of media and technology and the impact it has on their physical, emotional, social, and intellectual development.
