WHAT IS OUR APPROACH?

Prior to the early 2000's, the Verona community rarely passed capital improvement referenda to improve facilities for over 30 years. In 2005, the Board of Education set a goal to set a responsible course of action to improve our schools. At that time, the school district conducted a facility needs assessment with our architect of record estimating \$67 million in necessary capital improvement projects. Recognizing such a large number was too much for the Verona taxpayer to bear in one referendum, the Board of Education wisely decided to focus on the highest priorities planning three smaller, more manageable referendum votes. We were successful in passing the first two votes in 2005 & 2014. Since 2005, construction costs have continued to climb and additional facility needs have been identified due to our aging schools. The last phase to responsibly accomplish our goal is up for vote this November. Vote Building A Better Verona.
