### - A Little About The Project -

The F.N. Brown Elementary School SCA is

excited to offer you an opportunity to be a permanent part of our school! We invite you to participate in our yearly beautification project through the donation of a legacy brick. By donating a brick, not only are you commemorating your time at F.N. Brown, you are contributing to the success of F.N. Brown students and the future of our community. All donated bricks will be installed at the front of the school (butterfly garden walkway, surrounding flagpole, etc.).

Orders for the legacy bricks will be taken throughout the year, with the installation taking place each summer after the current school year order is complete. Replica bricks are also offered to display your support of F.N. Brown in your home or office.

The F.N. Brown SCA is a parent organization dedicated to promoting the welfare of our children at home, school and in the community. All of the proceeds from the Legacy Brick Project will be utilized to enhance the children's educational experience by providing them with various cultural arts programs, computer technology, schoolwide field trips and playground equipment. Funds raised through this project will also benefit many other programs and events, all of which are made possible through the generosity of SCA supporters.

**Picture Your Brick Here!** 

## Brick Options 4x8 Bricks

• 3 lines of 18 character personalization

• Graphic available on the Left or Right side with a 3 line, 10 character/line limit (includes spaces and punctuation)

## Bricks Provided by That's My Brick!<sup>®</sup>-

Adept Engraving LLC has been working with thousands of organizations throughout the country, helping them to raise funds for various causes through That's My Brick!® Fundraisers. We offer personalized bricks to further the success of your organization. Our bricks are great for plazas, memorials, walkways, and anywhere else you use bricks! Show your support by personalizing a brick today!

## The Marking Process -

That's My Brick!® uses a patented, laserbased marking process that produces a layer of black, fused glass on any color surface of the brick or tile. The marks are flush with the surface of the brick or tile, which means less maintenance and no chance of wear-based damage.

All samples passed each of the ASTM-specified test conditions (Freeze/Thaw cycling, Salt Spray exposure, Ultraviolet Light exposure) with flying colors. The independent testing has proven that bricks marked with our process and installed properly in your project will last longer than our lifetimes.
