

PRE-COLLEGE SUMMER EXPERIENCE AT NO CHARGE!

JUNE 28 – JULY 17

Summer College

AT CALDWELL

Summer College at Caldwell (SCAC) is a program designed for rising high school seniors (class of 2016) that provides the opportunity to earn three college credits while studying science, medicine and math. This unique opportunity also incorporates SAT test taking strategies, academic field trips and exposure to exciting new technologies such as 3-D printing and Google glass. Students will gain a taste of the college life while living on the Caldwell University campus and meeting new friends. The program includes room and board, books, supplies and field trips.

PRECOLLEGE THREE-CREDIT PROGRAM

The three-week program, June 28 – July 17, offers selected students the opportunity to experience courses taught by Caldwell University faculty in a small class environment. Students will

- Study biology, chemistry, environmental science and statistics
- Green reactions, medicine and vectors
- Participate in SAT test-taking strategy sessions
- Attend academic field trips, including the Liberty Science Center, Essex County Environmental Center and Duke Farms. We've even found a way to incorporate math into a NJ Jackals baseball game that will be shared by students, and Caldwell University faculty and staff!

Upon successful completion of the program, students will earn three college credits that will transfer to most colleges and universities.

Students will have the opportunity to attend workshops, College 101, that will assist them in understanding the college search process including financial aid, scholarship exploration and career counseling. Parents/guardians will also be able to experience workshops about the college search and financial aid in a relaxed setting with other families who will also be going through this same process.

There is limited space in the program, so apply now at caldwell.edu/scac.

There is no cost to the student to participate in this program. Funding from the US Department of Education College Access Challenge Grant through the NJ Commission on Higher Education.

The contents of this flyer were developed under a grant from the United States Department of Education (USDOE). However, those contents do not necessarily represent the policy of the USDOE, and you should not assume endorsement by the Federal Government.

ELIGIBILITY REQUIREMENTS

Students interested in applying should meet the following criteria:

- U.S. citizen or legal resident
- New Jersey resident high school senior in the fall 2015
- First-generation college student (neither parent has earned a four-year college degree)
- 3.0 or above high school GPA
- Three years of high school science (including biology and chemistry) and three years of high school math (including algebra and geometry)

Program admission is determined through review of completed applications, essay, transcript and letter of recommendation from a science or math teacher or school counselor. Learn more by visiting caldwell.edu/scac.
